

Metal Work - Training courses

Metal Work.

Leader in pneumatic automation
for over 50 years.

We believe that a greater technical knowledge of our products and their applications is essential for a correct relationship between us and the market.

With this in mind, we have structured ourselves so that we can offer a series of courses, dedicated both to the staff of our group and to our customers. The basic courses are four, subject however to customizations:

- Basic pneumatics
- Equipment maintenance
- Equipment sizing
- Advanced courses

Basic pneumatics

DURATION

1 day

LOCATION

Online / onsite

TO WHOM IT IS ADDRESSED

Designers of technical departments, maintenance personnel

PREREQUISITES

None

CONTENT

- Physical principles of pneumatics
- Operation of cylinders, valves and air treatment units
- Graphic symbology of cylinders, valves and air treatment units

DIDACTIC TOOLS

- General textbook of pneumatics
- Technical cards
- Metal Work selected products

Equipment sizing

DURATION

4 hours

LOCATION

Online / onsite

TO WHOM IT IS ADDRESSED

Designers in technical departments

PREREQUISITES

Metal Work Basic Pneumatics training course or fundamental technical knowledge

CONTENT

- Calculation for the sizing of pneumatic actuators
- Speed regulation of pneumatic actuators
- Valves choice
- Sizing of air treatment units and connecting pipes
- Software supports

DIDACTIC TOOLS

- Tables of strengths and consumption of air in the cylinders
- Tables of valves and tube capacity
- Easy Sizer software

Equipment maintenance

DURATION

4 hours

LOCATION

Online / onsite

TO WHOM IT IS ADDRESSED

Maintenance personnel

PREREQUISITES

Metal Work Basic Pneumatics training course or similar training

CONTENT

- Type of maintenance: preventive, predictive, extraordinary
- Interpretation of pneumatic diagrams
- Relationship between pneumatic diagrams and electromechanical systems
- Choice of the most appropriate pneumatic components

DIDACTIC TOOLS

- Text describing different types of maintenance
- Pneumatic and electrical systems
- Production programmes of the installations

Advanced courses

DURATION

1 day

LOCATION

Online / onsite

TO WHOM IT IS ADDRESSED

Salesmen and dealers of the Metal Work Group, designers of technical departments

PREREQUISITES

Metal Work Basic Pneumatics training course

CONTENT

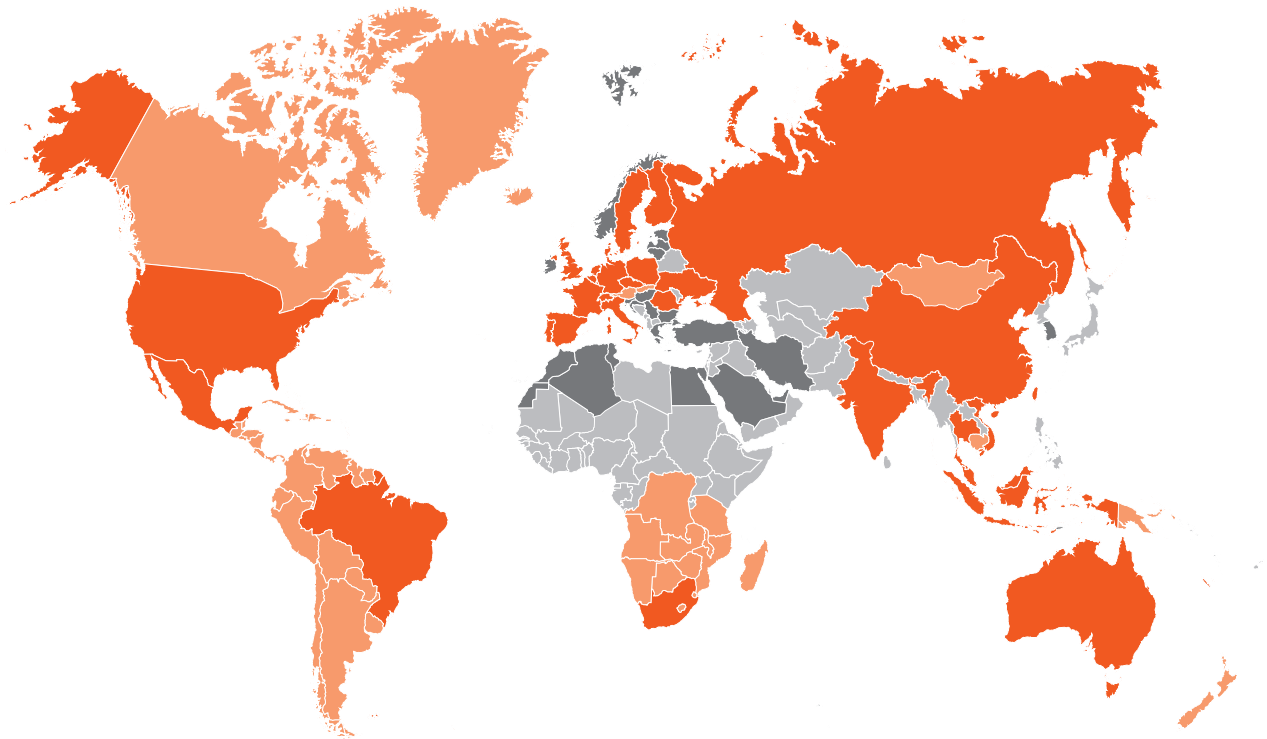

- Presentation of new Metal Work products
- In-depth study of product families and products of interest

DIDACTIC TOOLS

- Pneumatic diagrams
- Technical cards
- Metal Work Catalogue
